More about the innovations awarded:

### Digital Identity Award Winner:

blinking.id

Blockchain-based Digital ID Management Platform that gives users complete control over their private data. It is also a complete business solution for client authentication, Know Your Customer process and regulatory compliance for data storage. Blinking features MFA (Multi-factor authentication) , KYC (Know-Your-Customer) and regulatory compliance tool (GDPR, PSD2, FATCA, AML) based on SCA (Strong Customer Authentication) approach: something that user KNOWS, HAS and IS. More: <https://blinking.id>

### Government ID Award Winner:

aevatar.com

In compliance with recently released European directives and regulatory frameworks, European public and private enterprises look for innovative "RegTech" solutions that translate ID security and/or Data Protection regulatory requirements into convenient services, interoperate with legacy client-server environments to leverage efficient digital transformation and extend usage with everyday life apps to streamline the rise and growth of new trusted services. Ævatar is one of these solutions. More: <http://aevatar.com>

### IoT Security Award Winner:

www.sap.com

This showcase demonstrates a data protection scheme that ensures end-to-end security from low-power devices (SIGFOX and LoRa) to industrial applications. It meets the technical constraints imposed by LPNs, while preserving data confidentiality and integrity. The solution has been deployed on the water distribution network of the City of Antibes in France. More: <https://news.sap.com/2017/11/how-iot-is-turning-this-french-resort-town-into-a-smart-city/>

### Cybersecurity Award Winner:

www.cylance.com

Cylance is an artificial intelligence solution that is able to recognize and stop malware, scripts, and fileless threats before it ever executes on the endpoint, even while offline. Customers are able to quickly and easily able to reduce operational overhead. This is accomplished by requiring far less deployment time and resources, operational maintenance, management, and hardware resource utilization. More: [www.cylance.com](http://www.cylance.com)
